

About Us

Intuition Consultancies was founded over a decade ago with the goal of helping businesses avoid operational distractions and stay ahead of the rapid pace of change. We are now a rising star in Ontario's business community, delivering managed information and communications services and solutions to a growing number of small and mid-sized business throughout the province and beyond. Our professionals are known for their creativity, technical abilities, and unique approach to problem solving. We design solutions that allow businesses to harness the power of technology for greater efficiency and managed growth. For every challenge, we are inspired to develop a solution that exceeds expectations. At Intuition Consultancies we strive to make technology simple.

Industries Served

Each industry sector has its own set of unique circumstances and business requirements. **Intuition Consultancies** works closely with clients across multiple industries to bring specialized knowledge, skills, and certified professionals to address their most critical technology and business process needs. It is this experience, along with our dedication to giving clients the most reliable service, which sets us apart from other providers. **The following is just a small list of the industries we search:**

- Financial Services
- Manufacturing
- Architecture and Engineering
- Biotechnology
- Construction
- Healthcare
- Legal
- Nonprofits
- Professional Service
- Real Estate

Services Ecosystem

At **Intuition Consultancies**, we believe that the best way to serve clients is to create advanced technology solutions that allow them to be nimble, yet secure, in an ever-changing world. That's why we offer the Services Ecosystem, a highly customizable, modular set of services that allows us to prepare a comprehensive set of services that work together for success. With a diverse set of services and total customization ability, Intuition Consultancies' Services Ecosystem gives clients the opportunity to have all their IT needs met by one company with outstanding results.

Can your current IT providers do that?

Strategic Partnerships

There is strength in numbers. We understand the power of strategic partnerships and have forged tightly woven relationships with leading technology companies to make sure we got you covered no matter the business challenge. We combine our expertise with their state-of-the-art technology to power expertly designed solutions that deliver results and exceed expectations.

The Intuition Advantage

- We are laser focused on the security/stability of small and midsize business infrastructures.
- We have accrued knowledge across multiple sectors having worked closely with our clients. This deep, cross-sector intelligence allows us tailor solutions that exceed expectations.
- Our experts have the experience to map where your business is today and where it needs to be tomorrow. By understanding the long-term goals of the business Intuition Consultancies will ensure you have the right technology, policies, and processes in place to move forward.
- We provide reliable 24/7/365 support allowing stakeholders to focus on the business.
- We are hugely beneficial to businesses adapting to the new world of work with predictable pricing models and a more strategic approach to servicing the needs of clients.
- We are agile and can quickly and cost effectively scale to the needs of our clients.
- We are a growing telephony provider with over 4000 extensions under management.
- We are leaders in artificial intelligence and machine learning and use this expertise to build better solutions and improve business performance.
- Our fully redundant and high availability infrastructure provides computing reliability with 99.999% uptime to include a hot site for clients with mission critical businesses.
- Our dual MSP/MSSP model means we offer the most complete infrastructure and cybersecurity solution for infrastructure reliability and threat detection/remediation.
